DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Silverman (US Patent 5,464,422):

The patent to Silverman substantially discloses a surgical needle as recited in claims 1-2. Silverman is silent as the tapered ratios of the regions along the length of the needle. However, Silverman set out to solve the same problem recognized by the applicant wherein strength is not sacrificed for a decrease in penetration force of the needle. It would have been obvious to one having ordinary skill in the art to manufacture Silverman's needle with the same tapered ratios along the length of the needle.
